Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a method of transferring charged particles via an electric iris diaphragm/shutter, classified in class 427, subclass 2.14.
 - II. Claim 11, drawn to a method of screening charged particles by superimposing and adjusting AC electric fields, classified in class 427, subclass 282.
 - III. Claim 12, drawn to a method of controlling porosity, classified in class 427, subclass 243.
 - IV. Claims 13-20, drawn to an apparatus, classified in class 118, subclass 620.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III and Invention IV are related as processes and apparatus for practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice other and materially different processes of depositing powder, such as for coating a catalyst support.

Art Unit: 1762

3. Inventions I, II, and III are all unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, functions, and effects. Invention I transfers all particles via the electric iris diaphragm/shutter, while Invention II screens particles using oscillation such that only small particles are transferred, while Invention III is directed towards controlling porosity. These independent inventions have different operations, functions, and effects.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. Because these inventions are distinct for the reasons given above and the search required for each of the Groups is not required for the other Groups, restriction for examination purposes as indicated is proper.
7. A telephone call was made to Robert Patch on 7/17/2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Patch requested a written restriction requirement.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer Kolb Michener whose telephone number is 703-306-5462. The examiner can normally be reached on Monday through Thursday and alternate Fridays.
